📍 Kolkata, India

EDUCATION

09/2023 – 07/2026 Kolkata	Bachelor of Technology (B.TECH) in Computer Science Engineering (MAKAUT) Pailan College Of Management & Technology	CGPA - 8.67
08/2020 – 08/2023 Kolkata	Computer Science and Technology Diploma (WBSCTVESD) Budge Budge Institute Of Technology	CGPA - 7.6

SKILLS

Programming & Visualization:

Python, Js, R, Matplotlib, Seaborn, SQL, Tableau

Data Science & Machine Learning:

Numpy, Pandas, Scikit-learn, TensorFlow, Keras

MLOps & Deployment:

Streamlit, FastAPI, Docker, AWS, GCP

Tools & Others:

Git, LangGraph, Hugging Face, Jupyter Notebook

INTERNSHIPS

03/2025 – 04/2025 Remote	Quirky Connections Pvt Ltd : Generative AI Developer Intern Developed and deployed two specialized chatbots, integrating external generative AI models and securely managing API keys to power their core functionality.
07/2025 – 08/2025 Remote	Pinnacle Labs Pvt Ltd : Data Science Internship Developed NLP models for sentiment analysis, fake news detection and computer vision system.

PROJECTS

● ArogyaAI – Multilingual WhatsApp-Based Multi-Agent Healthcare Assistant 🔗

Technologies Used: Python, FastAPI, LangChain, NLP, RAG, Twilio WhatsApp API, Streamlit, Docker, Vector Database

Overview: AI-powered multilingual WhatsApp healthcare assistant with multi-agent architecture for symptom analysis, follow-up questioning, disease guidance, and emergency risk detection.

What it does:

- Understands user symptoms with context-aware follow-up conversations.
- Detects possible diseases and emergency health risks.
- Supports multilingual conversations for wider accessibility.
- Provides outbreak alerts and preventive healthcare awareness.
- Uses RAG-based medical knowledge retrieval for intelligent responses.

● User Intent Detection & Drift Monitoring System 🔗

Technologies Used: Python, Scikit-learn, TF-IDF, LR, FastAPI, Streamlit, Docker

Overview: AI-powered intent classification and drift monitoring system designed to detect user intent accurately and identify low-confidence or changing query patterns in real time.

What it does: • Classifies user intents using TF-IDF with SVM models.

- Detects confidence-based intent drift for monitoring changing user behavior.
- Provides real-time API responses using FastAPI architecture.
- Includes a live monitoring dashboard for prediction tracking and analytics.
- Supports Docker-based deployment with scalable modular architecture.

RELEVANT COURSEWORK

• Oracle Cloud Infrastructure 2025 Certified Data Science Professional 🔗

• AWS Certified Machine Learning - Specialty (MLS-C01 - English) 🔗

COMPETITIONS & HACKATHONS

Google Gen AI Hackathon - 2025

Built a generative AI solution to support and improve youth mental wellness.
